

H6032 - Smartphone 4G

By MobiWire

Introducing our latest 4G smartphone, the H6032. Coming in a sleek black elegant color, it features a compact HD screen and combines solid specifications with modern, original aesthetics. It offers a reliable device that delivers the latest connectivity without compromising style or functionality, all at an affordable price.

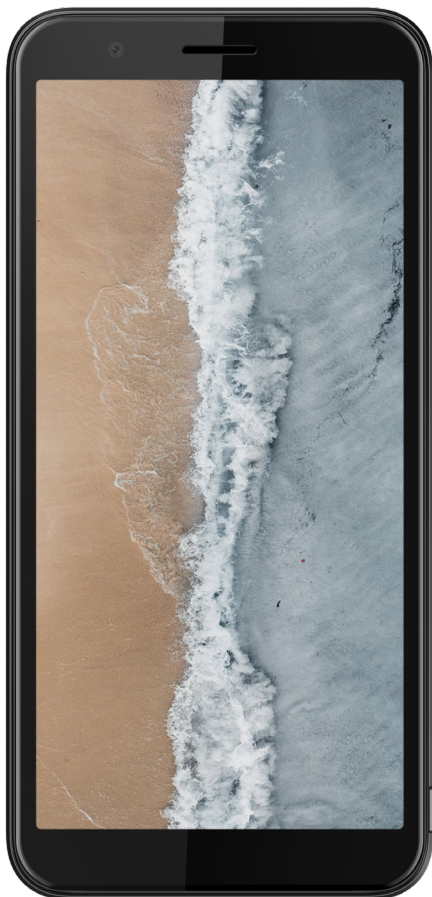

Optional features include Dual SIM either with a second physical SIM (by default) or an eSIM (optional), as well as optional NFC and a protective case.

Entry-Range affordability

The H6032 offers an excellent spec-to-price ratio, featuring a robust 3000mAh battery, 32GB of storage, and 2GB of RAM, all running on Android 14 Go version. Designed with accessibility in mind, the H6032 makes the latest technology available to a wider audience, ensuring that everyone can enjoy a reliable and feature-rich smartphone experience without breaking the bank.

Sleek Design

With a 5.99" HD full laminated display, ensuring an immersive viewing experience, the H6032 design emphasizes the dual camera module with a touch of originality and elegance. Gold accents contrast with the anthracite finish of the device, creating a refined, premium look. The back features a textured lower half that enhances the phone's ergonomics and improves its in-hand feel.

Product Description

KEY FEATURES

- . 4G technology
- . Android 14 Go
- . 5.99" HD full laminated display
- . Octa-core chipset
- . 3000 mAh battery
- . 32GB ROM/2GB RAM
- . Dual SIM
- . eSIM or NFC optional
