

# WM26

By MobiloT

## THE TABLET DEDICATED TO CONTACTLESS PAYMENT

### Full compatibility with traditional contactless payment

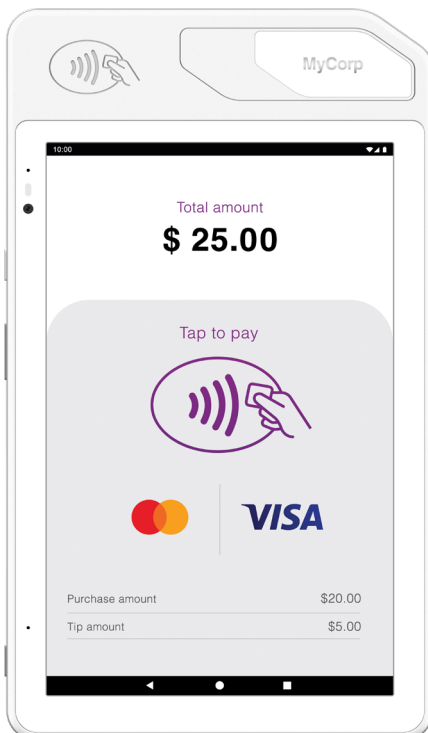

WM26 is a product with a high-performance NXP NFC controller dedicated to SoftPOS, on the front that has been designed to meet the requirement of the payment industry.

### High-capacity battery

WM26 is designed to meet the needs of demanding users such as merchants' shops, bar owners, and restaurants, who require their products to be always up and working during peak hours without the need for frequent recharging.

### Long lasting product design

Robust, IP65 protection of the tablet will allow a use in challenging environment. The tablet will also have a long life cycle, with regular Android security updates. This is also an eco-friendly terminal being built using recycled plastic.

### Product Description

EMV-L1 SoftPOS NFC tablet  
WM26 tablet has been designed to be used in all payment use cases. Its high-performance large NFC area in the front will allow easy NFC transactions with all bank cards.

**Use Cases** - For all professional scenarios

The tablet has been designed to be used in all conditions. Its large bright screen allows the tablet to be used in mobility, indoor and outdoor. It can also be used as a kiosk mode in shops leveraging VESA fixing. With its rich connectivity the tablet can be charged and used with any USB accessory, complying with EU regulations.

For easy deployment the tablet is compatible with Google Zero Touch solution.
